# Welcome CATTLEMEN & CATTLE WOMEN

Our purebred venture started with the goal to raise predictable, realistic, maternal genetics. To accomplish this, we wanted time tested proven genetics. We believe using proven maternal genetics is the key to a solid cow base. With strong maternal genetics, performance and carcass quality will fall into place. We focus on raising easy-fleshing moderate framed cattle with a calm disposition and calving ease. The ability to breed back on time is a must. They must be structurally sound with the ability to hang top-quality carcass values. Our genetics have done a remarkable job in the feedlot and on the rail with carcass data that makes us believe in our program.

We start calving the beginning of January using time-tested proven maternal AI sires. Our cows stay in close to the calving facilities and are artificial inseminated (AI) before going to pasture.

We wean all of our calves at the end of August each year and weaning weights and data is sent to the American Angus Association. Bulls are placed on a high roughage growth ration until our bull sale in March. During their 120-day gain test, they are weighed, PAP tested, ultra-sounded and fertility tested. Heifers are put on a roughage ration and at 120-days, yearling data is collected. They remain on the roughage ration until they are AI bred and sent to pasture with the mature cows in late May. When we began our program, the genetics of N-Bar EXT and Rito 707 were of high

interest to us. We felt they offered the best combination to achieve maternal quality, muscle, and longevity.

In the fall of 2009, we purchased a couple outstanding cows to add to our herd base. Sinclair Lady 7R30 853 is a daughter of Rito Revolve 0R5 and Majesty 853 of 5439 4465. We put this outstanding female in an embryo program raising elite daughters that have made a remarkable impact on our female base, along with selling five herd bulls to four different seedstock producers in Montana and Wyoming.

Sinclair BLKBIRD 8RL1 5XB10 is a daughter of Sinclair Rito Legacy and granddaughter of N Bar EXT. She has left us with superb daughters and granddaughters and has made a remarkable influence in our herd. She is the dam to HL Thunder Bolt, an outstanding son of Rito 7075.

Recently, we have added SAV Renown 3439, Ideal Encore of Ideal 9524 Lady and SAV Renovation 6822 to our AI program. These powerhouses will add some tremendous maternal bloodline to our herd that we can pass on to our customers.

We are always excited to talk about our program. If you want to visit our herd or just talk cattle give us a call. Thanks to all our customers & their support in the past.

- Charles

## SALE INFORMATION

### SALE DAY CONTACT:

Sale Barn.....**307-684-0789**  
Charles Hancock.....**307-250-6900**  
Leigh Vineyard.....**307-250-8881**

### ONLINE BIDDING:

DVAuction, viewing and bidding available at [www.DVAuction.com](http://www.DVAuction.com).

\*Pre-registration required to bid.

**HEARD HEALTH:** (We offer a strict health program.)

### ALL BULLS ARE:

- Tested negative for PI BVD
- Sold with health travel papers
- Calfhood vaccination- Vision 8 Somnus with SPUR, IBR, PI3, BRSV, BVD, Enforce 3. Same vaccinations at weaning and boosted at yearling. Ivermec Injectable Wormer. Bulls are on a mineral program from birth to sale time.
- Fertility tested- Dr. Allen Gotfredson, DVM
- Ultra Sounded - (Eric Geving)
- PAP Tested
- IVERMEC Injectable at weaning & first of the year
- Foot Rot weaning & boosted

**PAP TESTED:** ALL BULLS have been PAP Tested by Dr. Allen Gotfredson, DVM from Ten Sleep, WY. All bull calves were PAP tested at 4000 ft.

**HANCOCK LIVESTOCK WINTERING OPTION:** All bulls selling for \$4,000 or more can be wintered until APRIL 25th. Delivery will take place between April 25 - May 1. Please make arrangements with Charles prior to the sale or directly after the sale.

**\*Anyone picking up their bulls sale day will receive \$100 back per bull.**

### GUARANTEE:

■ All bulls selling for \$4,000 or more will be covered 50% by Hancock Livestock if they are injured during their first breeding season. Breeding season is defined as the 90-day period following the first turnout of the bulls.

■ 50% of the value of the injured bull, minus one-half salvage value, will be given as a credit in a future sale or towards a replacement bull if one is available. Salvage value, if any, will be split equally between Hancock Livestock and the buyer. All injured bulls must be diagnosed by a veterinarian. Does not cover any loss from an act of nature. Please notify us as soon as possible should injury occur and prior to the injured bull being sold for salvage. All claims must be made by 9-30-26.

**Example 1:** A \$5,000 bull is injured and will not heal. A credit of \$2,500 minus one-half any salvage value will be given to the buyer.

**Example 2:** A \$4,000 bull is injured and will not heal. A credit of \$2,000 minus one-half any salvage value will be given to the buyer.

**Example 3:** A \$3,000 bull is injured and will not heal. Buyer retains all salvage value. No credit will be given.

\* This is not a mortality policy.

**DELIVERY:** FREE delivery on bulls selling for \$4,000 or more to central points within 500 miles, after 500 miles delivery at cost.

### SIGHT UNSEEN GUARANTEE:

All sight unseen purchases will be satisfaction guarantee, if you have visited with Charles about the animal.

### BULL VIEWING:

View the bulls as early as the afternoon of March 20th at Buffalo Livestock Marketing, or prior at the ranch in Basin WY.

## **FEED RATION**

We have PAP tested for the past 13 years using the results as a tool to improve our cattle. We have had an improvement in scores each year. Along with the Angus Associations new PAP EPD we have had great success. This years average PAP score on our sale bulls is 37 with a high of 39. The use of low PAP sires has helped us to pass on low PAP genetics to our customers.

We worked with Hubbard feed to develop a feed ration to insure our bulls have sound feet and legs. Our ration consists of a high fiber protein pellet along with a complete mineral package, and long stem grass hay.

Presents an ideal blend of calving-ease, maternal and performance. Dam has a wean ratio of 100 on two calves.

"I APPRECIATE THE OPPORTUNITY TO PURCHASE HANCOCK BULLS.

The reasons I recommend them are:

1. These bulls come from proven bloodlines which provide reliability and predictability in their offspring.
2. The bulls I purchased have excellent dispositions which is passed on to their calves.
3. Maternal traits are very strong and offspring are excellent milkers
4. I have observed in our cattle how the Hancock bulls clean up udders with the first generation.
5. The Hancock bulls have proven to be easy fleshing a trait they pass on to their offspring."

### LOT 12 Dam H L Blkbd 4FX5 2E1

Exceptional Pathfinder cow sired by Sinclair Emulation 5522 XP.

At 12 years old 4FX5 still takes her assignment serious! Producing 10 calves on an average 366 day calving interval. With a wean ratio of 110.

To say the least she has done the above and beyond for our program!

5XX1 is a long-bodied long fronted bull with a lot of thickness and eye appeal. His dam is one of our top producers coming from one of our top cow families. Tons of maternal on both sides of his very unique pedigree. His dam has a production record of 110 on 10 calves with a calving interval of 367 days.

\*\*We will be retaining one half interest in this bull selling one half interest and full possession and full salvage value.

A real maternal keepsake. I can't say enough about this bull or his dam. He is a thick well balanced structurally correct bull loaded full of maternal greats. He has an outstanding pedigree along with a dam that has done a tremendous job for us. His dam turns 18 years old this year, 80% of the Bulls in the sale has his dams influence in them. She has done a remarkable job for us and continues to produce at a high rate at 18 years of age. She has a wean ratio of 107 on 16 calves with a calving interval of 358 days.

**\*\*We will be retaining one half interest in this bull selling one half interest and full possession and full salvage value.**

“We have used Hancock bulls for the past five years and have had great results. We couldn’t ask for better genetics and dispositions of the bulls that we have purchased. The calving ease and weaning weights have made the family ranch operation profitable. The replacement heifers that we have kept have great maternal qualities that we strive for in our commercial operation.”

Greg and Nocona Cantlin  
**Cantlin Double Horseshoe Ranch, LLC.**
